Education

Dhirubhai Ambani University CPI: 8.6	2025 - Present Gandhinagar, Gujarat
Maharaja Saiyajirao University CPI: 6.57	2021 - 2024 Vadodara, Gujarat
12th Jawahar Navodaya Vidyalaya (CBSE) Percentage: 92.6	2020 - 2021 Panchmahals, Gujarat
10th Jawahar Navodaya Vidyalaya (CBSE) Percentage: 91.6	2018 - 2019 Panchmahals, Gujarat

Projects

- RupeeRisk** | Python, yfinance, FRED API, statsmodels, pmdarima, scikit-learn, Streamlit, Plotly 
- Built 15 geopolitical tension indicators (4 transmission channels) via STL decomposition + 1-week exogenous lags to eliminate look-ahead bias; verified stationarity (ADF USD/INR = -7.64, p < 0.0001)
 - Backtested 9 models (ARIMA, ARIMAX, Lasso, GB, RF, 2 hybrids, Naïve RW, SES) over 200-week window; ARIMA+Lasso Hybrid led with 0.332% MAPE, 59% Directional Accuracy, Sharpe 1.33, +18.07% return
 - Chose ARIMA(1,1,0) over seasonal SARIMA after ACF/PACF ruled out seasonality at lags 13/26/52, beating Random Walk on Theil's U
- IndiaShield** | Python, Streamlit, Plotly, Tableau Public, SIPRI MILEX/TIV, yfinance, pandas, NumPy 
- Built a 5-module dashboard consolidating 25 years of SIPRI expenditure data, Union Budget allocations (FY16–FY25), and NSE defence equity prices across India, China, Pakistan, USA
 - Engineered the SIDS (Strategic Import Dependency Score), classifying Russia at SIDS = 72 (Critical) post-2022; found Modernisation Paradox – CapEx share fell 38.3%→28.9% despite 2.5x budget growth
 - Ran an event study on 6 NSE defence equities across escalations (Balakot, Galwan): HAL and BEL posted +23% avg gains over ±30 trading days vs a declining Nifty 50
- ShramikSaathi** | LLaMA 3.1 8B, LoRA (PEFT), DPO (TRL), FAISS, sentence-transformers, Gradio, Lightning AI A100 
- Co-built a 9-layer RAG + ReAct pipeline on LLaMA 3.1 8B (cross-domain router, FAISS retriever over 311 docs, DPO-aligned generator) for PF/EPFO, payslip audit, and labour rights.
 - Contributed the Condition Coverage Score (CCS), improving 0.000→0.714 via LoRA SFT + DPO ($\beta=0.05$); sufficiency gate accuracy rose 0.500→0.991.
 - Trained DPO on 373 preference pairs across 4 dimensions, achieving grounded_clean = 0.750 with zero citation fabrication on held-out data.
- LogiSense** | PostgreSQL, SQL, Python, pandas, HTML/CSS/JS, Netlify 
- Designed a 7-table BCNF-normalised PostgreSQL schema; authored 10 analytical SQL queries across 9 dashboard tabs (branch failure analysis, IQR outlier detection, customer segmentation)
 - Built a zero-backend HTML/JS dashboard (Netlify-deployed) with live SQL query viewer, piloted by 2 logistics companies
- Screen Time & Sleep Duration** | Python, pandas, NumPy, statsmodels, SciPy, Matplotlib, Google Forms, Excel
- Designed a stratified random sample (n=30 of N=1,624) across 4 academic-year cohorts via proportional allocation, and built a paired exam-week/regular-week survey instrument distributed and tracked via Google Forms.
 - Fit SLR and MLR models (sleep duration on screen time, workload, caffeine, physical activity); screen time explained $\leq 1.1\%$ of variance (p=0.581) across 6 functional-form transformations, while physical activity emerged as the most consistent positive predictor of sleep ($\hat{\beta}=+0.24$ to $+0.46$ hrs).
 - Diagnosed the null screen-sleep result via Cook's Distance and outlier removal (n=27), then modelled 3 missing-data mechanisms (MCAR/MAR/MNAR) via a DAG to show mean-imputation would understate the true effect if data were MNAR.

Technical Skills

Languages: Python, R, SQL, PostgreSQL

Developer Tools: Excel, Git, Jupyter Notebook, VS Code, Docker, Tableau, Power BI

Frameworks/Libraries: statsmodels, pmdarima, scikit-learn, Streamlit, Plotly, Matplotlib, Seaborn

Cloud/Databases: MySQL, PostgreSQL

Coursework: Data Structures and Algorithms, Statistics, Time Series, DBMS, Deep Learning, Machine Learning

Soft Skills: Team Collaboration, Leadership, Problem Solving, Communication, Time Management

Areas of Interest: Data Analyst, Business Analyst, Data Scientist, AI/ML Engineer

Position Of Responsibility

Group Task Leader: SSB 2025 – Led peers in group tasks, showcasing teamwork and leadership under pressure

School Captain: JNV 2020–21 – Represented students, coordinated events, promoted discipline and collaboration

President: Science Club 2018–20 – Organized exhibitions, peer sessions, and represented school in fairs

Achievements

- NGO Volunteering: Supported 50+ economically disadvantaged families at a Vadodara humanitarian NGO (2024) through data entry, supply coordination, and patient intake record management.
- Secured 3rd Place at Regional Science Exhibition while representing the school.
- Cleared AFCAT & CDS Written Examinations and advanced to SSB selection.
