PROFESSIONAL SUMMARY

M.Sc. Data Science student at DAU with a curriculum spanning machine learning, NLP, statistical modelling, big data analytics, and causal inference. Delivered 5 end-to-end projects in forex forecasting, public health analytics, logistics intelligence, strategic defence intelligence, and behavioural science — each grounded in rigorous statistical methods and measurable outcomes.

EDUCATION

Dhirubhai Ambani University (DAU), Gandhinagar

Jul 2025 – Present

M.Sc. Data Science · CGPA: 8.6 / 10

Machine Learning, NLP, Statistical Modelling, Big Data Analytics, Causal Inference, Interactive Data Visualization

Maharaja Sayajirao University of Baroda

Jun 2021 – May 2024

B.Sc. Statistics (Honours)

Probability Theory, Regression Analysis, Time Series, Design of Experiments, R Programming

PROJECTS

RupeeRisk — India Macro & Geopolitical Forex Intelligence Platform | [GitHub](#) · [rupeerisk](#)

Feb 2026 – May 2026

Python · yfinance · FRED API · SARIMA · ARIMAX · Lasso · Gradient Boosting · ADF Diagnostics · Streamlit

- Engineered 15 geopolitical tension indicators across 4 transmission channels (Oil Supply, Direct FX, Risk-Off, Trade Route) using STL decomposition, ADF diagnostics, and 1-week exogenous lags to eliminate look-ahead bias.
- Achieved 0.458% MAPE and 73.08% Directional Accuracy on a 52-week rolling backtest — outperforming SARIMA baseline by 17.3pp MDA — yielding Sharpe Ratio 2.68 and +11.70% cumulative return with the Lasso model.

IndiaShield — Strategic Defence Intelligence & Security Analytics Platform | [GitHub](#) ·

May 2026 – Present

IndiaShield

Python · Streamlit · Plotly · SIPRI Data · yfinance · pandas · NumPy

- Built a 5-module strategic intelligence dashboard consolidating 25 years of subcontinent military expenditure data, Union Budget allocations (FY16–FY25), SIPRI arms transfers, and NSE defence equity data across India, China, Pakistan, and the USA.
- Engineered the SIDS (Strategic Import Dependency Score) — a novel composite metric modelling India's arms supply-chain vulnerability per supplier using import concentration, single-source risk, geopolitical stability, and domestic substitution capacity.
- Quantified a Modernisation Paradox: CapEx share fell from 38.3% (2015) to 28.9% (2024) despite 5× budget growth; identified Russian supply-chain lock-in (SIDS = 72, Critical) and documented +23% average defence equity gains during border escalations.

A World in Numbers — Global Inequality, Health & the Planet

Feb 2026 – Apr 2026

Python · Tableau · Hypothesis Testing · Causal Inference (DAGs) · Choropleth · WHO GHE-D · Global Carbon Project · Team of 4

- Led Hypothesis 3 across 195 countries — built dual-axis Tableau visualisations, applied DAG causal inference, identified Out-of-Pocket expenditure as confounder masking the tax-health relationship ($R^2 = 0.13$); outlined a policy framework for health financing and independently extending the analysis.

LogiSense — Logistics Intelligence & Analytics Platform | [GitHub](#) · [logisense](#)

Aug 2025 – Nov 2025

PostgreSQL · BCNF Normalization · Advanced SQL · HTML Dashboard · Customer Segmentation · Team of 3

- Proposed and implemented IQR-based charge outlier detection; led query refinement discussions, contributing to 20+ queries across a 7-table BCNF-normalised schema.
- Built an AI-enhanced demo interface to improve schema comprehension during live presentations — adopted for pilot evaluation by 2 logistics companies.

Screen Time & Academic Performance — Minor Research Project

May 2026 – Present

Python · R · OLS Regression · Bland-Altman Analysis · DAG Causal Inference · Predictive Modelling · DAU

- Conducting a 3-wave longitudinal survey (n = 30–35) at DAU; applying Bland-Altman analysis to quantify screen time reporting bias and building a predictive model to quantify its effect on academic performance and mental wellbeing — with actionable student recommendations.

SKILLS

Languages & Tools: Python, R, SQL, PostgreSQL, Excel, Git/GitHub, Jupyter Notebook, statsmodels, pmdarima

BI & Visualization: Tableau, Power BI, Streamlit, Plotly, Matplotlib, Seaborn

ML & Analytics: Lasso, Gradient Boosting, Random Forest, SARIMA, ARIMAX, Feature Engineering, ADF Testing, Customer Segmentation

Statistics: Hypothesis Testing, OLS/Multivariate Regression, Causal Inference (DAGs), STL Decomposition, Bland-Altman Analysis, Time Series Analysis

CERTIFICATIONS

- Google Business Intelligence Certificate · Google · 2026
- Product Analytics Certification · Pendo & Mind the Product · 2026
- Databricks Data Analyst Certification · Databricks · In Progress

ACHIEVEMENTS & VOLUNTEERING

- Cleared AFCAT & CDS Written Examinations and progressed to SSB selection for Indian Air Force Commission — demonstrating high discipline, leadership under pressure, and long-term commitment to the defence domain.
- Supported 50+ economically disadvantaged families at a Vadodara humanitarian NGO (2024) through data entry, supply coordination, and patient intake record management.
- School Captain & House Captain — Jawahar Navodaya Vidyalaya · 3rd Place, Regional Science Exhibition
